CFHT Filter Order Form

Requested by : _____ Account No. : _____

Date needed by (allow 4 months) : _____

CFHT standard specifications:

- size is 50.8 x 50.8 mm +0.0 -0.5 mm
- maximum thickness : 6 mm
- imaging quality ($\lambda/4$ Peak to Valley over the surface)
- hard AR coating on both surfaces
- blocking of 10^{-4} from 3000 Å to 11000 Å (1.1 μm) outside the band
- band width and central wavelength specified for 0°C and a parallel beam

#	CW (Å)	ΔCW (Å)	BW (Å)	ΔBW (Å)	% T Min.	# Cav	Comments	Price $US

NOTE :

- Standard ΔBW and ΔCW are typically 20% of the BW. Tighter tolerances are possible, but usually at a higher price.
- A red shift of the BW of roughly 0.18 Å/°C should be expected.
- Use the comments column for any special requirements.
- The price column will be filled after the receipt of a quote and a copy of this form will be sent back to the requestor.
